

Let's create the Tokyo 2020 Games Mascots!

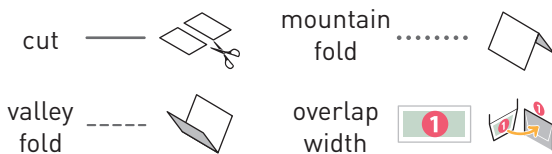

Please be careful!

When using scissors, please make sure not to hurt yourself, and please make sure adults are nearby to help.

Items you will need for this project

- Scissors or cutter knife
- Cutting mat
- Spatula or something similar
- Ruler
- Glue
- Toothpick (to use with glue)
- Tweezers

Explanation of marks

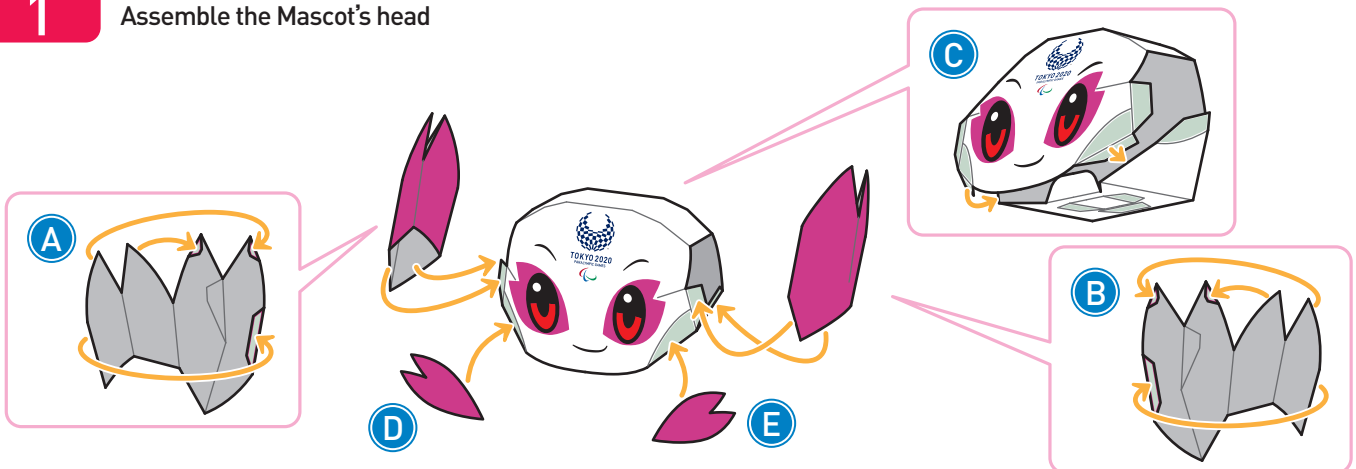

Before you start, please check

- When cutting
Please cut using scissors along the cutting line. As for the detailed parts, please do them later. When using scissors, it may be better to move the paper around to cut it.
- When folding
It is probably easier to fold when marking a line using a spatula on the lines to be folded.
When the lines are marked, please fold them using mountain folds or valley folds.
- When pasting
Please use bond type glue for assembling as it is stronger than regular glue. Please try to make the surface of the paper to be glued on round so that it can be easily pasted.
Please glue and paste according to the order in the instructions. Using a toothpick will be useful to paste glue in a wide and thin range. Please hold the glued parts with your fingers until the glue dries.
For the detailed areas that are hard to hold with your fingers, please use tweezers.

How to assemble

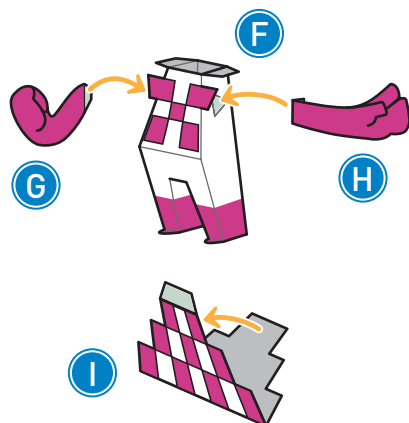

1

Assemble the Mascot's head

2

Assemble the Mascot's body

3

Assemble the Mascot's head to the Mascot's body
